PROFESSIONAL SUMMARY

Entry-level Android and Flutter developer and BS Computer Science graduate with hands-on experience building a Java and XML Android application with Firebase authentication and backend integration. Completed an Android App Development course and currently learning Flutter and Dart. Familiar with Git, REST APIs, and Material Design, and skilled in problem-solving, debugging, and UI design. Seeking an Android Developer, Flutter Developer, mobile app developer, or internship role to build real-world applications and grow within a professional team.

TECHNICAL SKILLS

Mobile Development: Android Development, Java, XML, Android Studio, Flutter, Dart, Material Design

Backend & Tools: Firebase (Authentication and Backend Services), REST APIs, Git

Core Skills: Programming Fundamentals, Application Development, Debugging, UI / UX Basics, Problem Solving

PROJECTS (PERSONAL / ACADEMIC)

SmartTailor – Android Mobile Application

Personal portfolio project | Java, XML, Android Studio, Firebase

- Developed a tailor shop management Android app in Java and XML to manage customers, measurements, orders, and order status.
- Integrated Firebase for backend and authentication functionality.
- Implemented profile-related features alongside core customer and order management workflows.
- Designed a dark, modern mobile user interface for a practical, real-world use case.

University Application Projects

Academic coursework | Islamia University of Bahawalpur

- Developed mobile and desktop applications as part of university projects.
- Worked on coding, debugging, and UI design while focusing on solving real-world problems.
